

# You can control the entertainment atmosphere with the minimum of operator training using versatile **ARX** featuring the new **ARX BarMIX**

Select from a wide range of ARX speaker systems to meet your exacting needs.

Room One

The **ARX BarMIX** is a unique 'user-friendly' Zoner/Mixer, enabling a choice of four stereo audio sources to be routed to each of two zones. All inputs have rear mounted trim controls to balance the inputs. Each of the two stereo output zones can have an option installed so that the volume can be remotely or locally controlled ie from the control of the unit itself, or remotely, with the optional BM-1 Remote Level Control. A front panel LED indicates which option is active.
